

In the claims:

1-9. Cancelled

10. (original) A telescoping skateboard comprising:

a rear wheel assembly;

a heel platform mounted over the rear wheel assembly;

a retractable front wheel assembly;

a telescoping frame joining said front wheel assembly and said rear wheel assembly;

a toe platform mounted on the telescoping frame; and

a microboard mounted over the rear wheel assembly such that it may swivel into a position over the heel platform or to a position such that said microboard may project from either side of the skateboard,

wherein the toe platform mounted on the telescoping frame can retract to a folded position in which the toe platform is at least partially under the heel platform and the microboard is over the heel platform.

11. (original) The telescoping skateboard of claim 10 wherein said front wheel assembly is a single wheel mounted on a pair of struts.

12. (original) The telescoping skateboard of claim 10, wherein said toe platform includes a side angling means for toe positioning.

13. (original) The telescoping skateboard of claim 10, further including a toe strap.

14. (original) The telescoping skateboard of claim 13, further including a heel strap.

15. (original) The telescoping skateboard of claim 10, wherein in said telescoping frame includes a spring linking the front wheel assembly and the rear wheel assembly.

16. (original) The telescoping skateboard of claim 10, wherein said heel platform is raised in respect to said toe platform.

17. (original) A telescoping skateboard comprising:

- a rear wheel assembly;
 - a heel platform mounted over the rear wheel assembly;
 - a retractable single wheel front wheel assembly;
 - a toe platform;
 - a telescoping frame joining said front wheel assembly and said rear wheel assembly wherein said toe platform is mounted to one end of the telescoping frame;
 - a spring mounted such that the spring extends along a length of the telescoping frame and provides a force retracting said front wheel assembly and said rear wheel assembly toward each other; and
 - a side facing microboard mounted over the rear wheel assembly such that it may swivel into a position over the heel platform,
- wherein the toe platform mounted on the telescoping frame can retract to a folded position in which the toe platform is at least partially under the heel platform and the microboard is substantially over the heel platform.

18. (original) The telescoping skateboard of claim 17, wherein said toe platform includes a side angling means for toe positioning.

19. (original) The telescoping skateboard of claim 17, further including a toe strap.

20. (original) The telescoping skateboard of claim 17, further including a heel strap.

21. (original) The telescoping skateboard of claim 17, wherein said heel platform is raised in respect to said toe platform.
